Event "Tokyo Headphone Festival 2020 Spring" cancelled

FUJIYA AVIC (FUJIYA CAMERA Co.Ltd Audio Division)

We have cancelled the event "Tokyo Headphone Festival 2020 Spring", scheduled for April 25-26, due to the current situation where nuovo coronavirus is causing worldwide pandemic.

This decision means that our event meets some conditions that cause the diffusion of nuovo coronavirus, current traffic conditions make it difficult for many companies in Asia, America and Europe to participate, and some new products launch was postponed due to stagnant industrial production.

And we do not expect this situation to improve much at the end of April.

So we avoid health risks for all stakeholders, including exhibitors, and especially for Audiophile.

And we hope to end this pandemic as soon as possible and enjoy a life of free music and activities.

Note: We plan to launch new products online on April 25.

We believe that many exhibitors need to avoid economical losses and keep opportunity

for many new product launches.
